EDUCATION

seeking co-op or internship / Winter or Summer 2027 / 4 to 8 months

Bachelor of Software Engineering (Honours) | *Ontario Tech University*

September 2023 – June 2028

GPA: 4.06 / 4.30

Honors: President's List

EXPERIENCE

Full Stack Developer Intern | HireZapp

May 2026 – August 2026

- Shipped UI/UX fixes from user feedback in the production React codebase with the CTO and a senior developer, using AI tools (Copilot, ChatGPT, Claude, Gemini) to debug and test
- Redesigned communications hub in Figma, simplifying tabs and navigation; shipped to production after CEO approval
- Implemented SEO and AI-search fixes on the live site, including FAQPage JSON-LD structured data and optimization of 100+ blog posts, with technical docs for follow-up work
- Audited 15+ web pages against 20+ competitors, documenting each issue, why it hurt users, and the fix; shipped the fixes to the live site

Chief Marketing Officer | Tech Management Student Association | OTU

January 2026 – Present

- Built React and Firebase features for the association's event platform, including real-time registration, team formation, and admin dashboards
- Managed social media and event promotion, designing visuals and reels and using analytics to adjust content; grew Instagram engagement 70% in 2 months and drew 100+ attendees to the flagship industry night mixer

Web Development Intern | CodePhoenix Web Solutions, India

July 2025 – August 2025

- Built 5+ responsive web pages from Figma wireframes using HTML, CSS, and JavaScript, improving mobile load performance by 25%
- Integrated REST APIs and dynamic form handling across 5+ user workflows, reducing form errors by 40%

PROJECTS

Farsight | React, TypeScript, Tailwind CSS, Multi-Agent Systems | Top 100 of 11K+ applicants, FAR AWAY 2026

- Co-built Farsight, a working prototype of a multi-agent railway intelligence platform that simulates station crowds with passenger, security, train, and medical agents on a live digital twin
- Implemented an observe, predict, reason, recommend, act loop and a scenario builder (weather, delays, festival rush) where AI recommendations change the simulation, deployed live on Vercel

E-Commerce Inventory Order Management System | Node.js, Express.js, MySQL, JavaScript

- Built a full-stack inventory and order management platform with role-based Admin, Staff, and Customer dashboards and REST APIs for inventory and order workflows
- Implemented JWT authentication, bcrypt password hashing, and input validation across the backend, with MySQL storage, CSV/PDF report exports, and external product import via the DummyJSON API

AI Learning Coach | Python, Multi-Agent Systems

- Built a multi-agent AI system in Python using an orchestrator pattern to coordinate 5+ specialized agents (planning, research, summarization, scheduling)
- Added memory and session-state services to keep context across agent handoffs, and integrated search to generate time-blocked study plans

AWARDS & LEADERSHIP

- TECHNATION AI Equity Data Challenge** | Top 10 across Canada (2025)
- Peer Mentor, Level 1 Ambassador, Peer Educator** | Ontario Tech University (2023-Present)

SKILLS

- Languages:** Python, TypeScript, JavaScript, Java, C++, SQL, HTML/CSS
- Full-Stack and Data:** React, Tailwind CSS, Node.js, Express.js, Spring Boot, REST APIs, JWT, MySQL, Firebase
- AI:** LLM Applications, Multi-Agent Systems, Agent Orchestration
- DevOps and Testing:** Git, GitHub, Docker, CI/CD, JUnit, Linux, Vercel
- Design and Product:** Figma, Wireframing, UX Audits, Agile/Scrum, Jira
